keerthivj66@gmail.com

OBJECTIVE

- Front-End Angular Developer with over 5+ years of practical experience in developing dynamic, responsive, and scalable web applications.
- Proficient in Angular, TypeScript, JavaScript, HTML5, CSS3, RxJS, Jasmine & Karma, Angular Material, and Bootstrap.
- Extensive experience working with multiple versions of Angular (13, 8, and 6) to build modern single-page applications (SPAs).
- Strong understanding of REST APIs and HTTP protocols, enabling seamless API integration and efficient data communication within Angular applications.
- Skilled in developing reusable Angular components, custom directives, pipes, shared modules, and dynamic templates for scalable application architecture.
- Hands-on experience with reactive programming using RxJS.
- Advanced proficiency in CSS and SASS for creating responsive, maintainable, and visually appealing user interfaces.
- Experienced in implementing responsive web design, cross-browser compatibility, and front-end performance optimization techniques.
- Proficient in using Angular Material and Bootstrap to design clean, user-friendly, and responsive UI layouts.
- Strong knowledge of form handling, validation, routing, lazy loading, and component-based architecture in Angular applications.
- Familiar with Agile/Scrum development methodologies and collaborative development workflows.
- Proficient in version control systems such as Git and Bitbucket for efficient code management and team collaboration.

EDUCATION

BE (IFET College Of Engineering) - 2020

EXPERIENCE

Orion Innovation DEC 2024 – JUN 2026

TVM InfoTech NOV 2020 – DEC 2024

KEERTHIVASAN

Angular Developer
+91 9080570298
keerthivj66@gmail.com

SKILLS

Frontend: HTML5, CSS3, JavaScript, TypeScript, Angular (6,8,16,18), RxJS, NGRX, Angular Material Bootstrap, Jasmine and Karma..

Databases: MySQL.

Tools & Processes: Git, Bitbucket, Jenkins, JIRA, Agile, SonarQube.

PROJECTS

Project -1: DISCIPLINE

Role and Responsibility:

- Collaborated with cross-functional teams to translate business requirements into scalable front-end solutions using Angular.
- Built responsive and user-friendly UI components using Angular Material, Bootstrap, CSS, and SASS.
- Developed reusable Angular components, custom directives, pipes, and shared modules to improve code reusability and maintainability.
- Integrated RESTful APIs using Angular HTTP Client for seamless data communication and dynamic content rendering.
- Implemented lazy loading, routing, and reactive programming concepts using RxJS to enhance application performance.
- Optimized application performance through efficient coding practices, debugging, and reducing unnecessary re-renders.
- Participated in code reviews and collaborated with team members to maintain high-quality front-end development standards.

Project -2: AFL

Role and Responsibility:

- Collaborated closely with stakeholders, product owners, and business analysts to gather and interpret project requirements.
- Ensured technical feasibility of requirements within Angular front-end architecture and identified potential implementation challenges early.
- Improved application performance using Angular optimization techniques such as lazy loading, AOT compilation, and tree shaking.
- Implemented Angular reactive forms with robust validations and two-way data binding to enhance user experience.
- Integrated RESTful APIs using Angular HTTP Client to enable smooth and efficient data communication on the front end.

Project -3: RBFA

Role and Responsibility:

- Contributed to all phases of the front-end development lifecycle, from requirement analysis to deployment and maintenance of Angular applications.
- Developed interactive and responsive user interfaces using Angular, focusing on usability and modern UI design principles.
- Participated in regular status meetings, providing updates on development progress and actively engaging in peer reviews.
- Reported project progress to leads, sharing technical insights and suggestions for improving front-end performance and design.
- Designed and structured applications into reusable Angular modules, components, and services to improve maintainability and reduce code duplication
